**X Activities**-excerpt from El Dorado Ag Day presentation

**A visual demonstration to illustrate the concept of bees' pollination to students:** Place a stick of honey at the bottom of a container. Pour a bag of Dorritos in the container, to cover up the honey stick. Have a student reach in the container to pick out the stick of honey from the bottom. Explain to the student that the dust on his/her arm (from the Dorritos) is like the pollen on the legs of the honey bees.
